DETAILED ACTION

Election/Restrictions

1. Claims 3-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected expansion embodiment, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/28/04.

Drawings

2. Figures 1, 9 and 13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claims 1, 2 and 7 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

Art Unit: 3765

manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

However, claims have been examined as best understood.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Morkunas (US 5,708,977).

In regard to claims 1, 2 and 7, Morkunas teaches a fastener (51) that is located at any seam of a garment as desired (column 4, lines 59-65). The fastener mates to a receiving end (61) of a fastener that is more than one, but no more than 9. Further, Morkunas teaches the percentage length of the fastener ranging from .1% to 100% (column 4, lines 59-65). The fastener of Morkunas that can be located at any location along a standard seam of a garment. It would therefore be inherent that the fastener can be located along both the left and right sides of an upper garment from the wrist of the sleeve through the armpit to the bottom of the upper garment, since this is a normal location for a standard seam.
